

## Cast Iron Liner

An elasticated polyester cipp drain liner that is significantly downsized to give a near pristine internal finish even in broken cast iron pipes with a degree of limescale and encrustation. The elastic properties enables this lateral liner to negotiate 90 degree bends with relative ease.

<b>Liner Size Availability</b>	4, 5, 6" (100, 125,150mm)
<b>Coating stiffness</b>	Soft - Medium
<b>Movement Inversion head</b>	Medium
<b>Burst Pressure</b>	Medium
<b>Temp Resistance</b>	50 deg C
<b>Method of seam</b>	Welded Fillet + Welded Tape
<b>Thickness Availability</b>	3.5mm
<b>Bends ability</b>	67 deg
<b>Liners Stretch capability</b>	15%
<b>Supply Packaging sizes</b>	70m (230 ft)
<b>Possible CIPPTechniques</b>	Direct Inversion, Invert and Invert,Invert and Inflate, Double Inversion
<b>Possible Lining Processes</b>	Plumb Liner
