

Sewer Bend Liner

This coated polyester CIPP liner is manufactured for the Trenchless Relining of Large Diameter Sewer Pipes and Laterals between 8 inch - 12 inch. Its ultra flexible coating allows it to be used on up to 90 degree bends. When cured, it leaves behind a 5 - 6 mm thick Cured in Place Pipe Liner laminate.

Liner Size Availability	6, 8, 9, 10,12" (150, 200, 225,250,300mm)
Coating stiffness	Medium
Movement Inversion head	Low - Medium
Burst Pressure	Medium
Temp Resistance	50 deg C
Method of seam	Welded Fillet + Welded Tape
Thickness Availability	5 - 6 mm
Bends ability	67 deg
Liners Stretch capability	15%
Supply Packaging sizes	70m (230 ft)
Possible CIPPTechniques	Direct Inversion, Invert and Invert,Invert and Inflate, Double Inversion
Possible Lining Processes	Town Liner
